

Disclosure Notice

Swyft Markets South Africa (Pty) Ltd (Swyft Marakets) provide clients with access to an online trading platform where they can trade Contracts for Difference (CFDs). CFDs are complex financial instruments that carry a high level of risk and may not be suitable for all investors.

Important Information About Our Role

- We provide the technology and platform that enables clients to access CFD trading.
- We are not the counterparty to your trades. All CFD trades are executed directly with a third-party liquidity provider, who acts as the counterparty.
- We do not hold or control client funds. Client deposits are placed directly with the third-party liquidity provider.
- We do not guarantee or warrant the performance of any CFD trade.

Risks of Trading CFDs

- **Leverage risk:** CFDs are leveraged products and may result in losses that exceed your initial deposit.
- **Market risk:** Prices of CFDs can move rapidly due to market volatility.
- **Liquidity risk:** Market conditions may make it difficult or impossible to close a position.
- **Counterparty risk:** Your counterparty is the third-party liquidity provider, not us. You are exposed to their credit and operational risk.
- **Complexity risk:** CFDs are not suitable for inexperienced investors. You should ensure you fully understand how they work, and the risks involved before trading.

If you are uncertain about whether CFD trading is suitable for you, we recommend seeking independent financial advice.

Client Responsibility

By using our platform, you acknowledge and agree that:

- You understand that CFD trading involves significant risk of loss.
- You are trading at your own risk with the third-party liquidity provider as counterparty.
- You will not hold us responsible for losses incurred from trading CFDs.
